

Sri Vishal Kotari

(AI & Machine Learning Engineer)

Medway, MA | +1 (248) 497 9426 | kotarisrivishal9@gmail.com | LinkedIn: [Sri Vishal Kotari](#) | GitHub: [vishal9640](#)

PROFESSIONAL SUMMARY

AI & Machine Learning Engineer with a Master's in Computer Science, specializing in **LLM-based systems, Agentic AI, and Deep Reinforcement Learning**. Experienced in designing and deploying **end-to-end ML and GenAI pipelines** using PyTorch, LangChain/LangGraph, and RAG architectures. Proven ability to build **production-ready AI systems** with measurable improvements in accuracy, robustness, and automation, seeking an AI/ML Engineer role focused on scalable, real-world AI solutions.

PROFESSIONAL EXPERIENCE

AI / ML Engineer

Aug '25 – Dec '25

Multi-Agent Resume Screener (LLM + RAG) | Graduate Research

Technologies: Python, LangChain, LangGraph, Chroma, FastAPI, Streamlit, PostgreSQL, Ollama

- Built an end-to-end ML pipeline using LLMs and RAG to analyze resume-JD fit, generating ATS-style scores, gap analysis, and interview questions.
- Implemented agentic workflows with LangChain/LangGraph, FastAPI, Streamlit, vector search (FAISS/Chroma), and PostgreSQL for traceable, citation-backed scoring.
- Improved resume relevance and job-match accuracy through automated skill alignment and seniority evaluation.

TECHNICAL SKILLS

Programming	: Python (NumPy, Pandas, Scikit-Learn), SQL, Bash, C
AI & Machine Learning	: Supervised & Unsupervised Learning, Deep Learning, Reinforcement Learning (DDPG), NLP, Model Evaluation, Feature Engineering, Transformers, Retrieval-Augmented Generation (RAG), Vector Databases
Frameworks & Libraries	: PyTorch, TensorFlow, Stable Baselines3, LangChain, LangGraph
Generative AI	: LLMs, Adversarial Training, Ollama, n8n
MLOps & Cloud	: Docker, Git, Linux, AWS (EC2, S3), Azure Log Analytics, Model Deployment

EDUCATION

Lawrence Technological University, Southfield, MI

Master of Science in Computer Science | CGPA: 3.54/4.0

Jan '24 – Dec '25

Courses: Machine Learning, Algorithms, Robotics & AI, Computer Security, Network Security, Advanced Cryptography

DRK Institute of Science and Technology, Hyderabad, India

Bachelor of Technology in Computer Science | CGPA: 7.31/10

Aug '19- July '23

Courses: Computer Networks, Cryptography, Advanced Operating Systems, Database Management, Machine Learning, C, Python, Data Structures and Algorithms, Cloud Computing.

Projects:

• Generative AI Pipeline for Adversarial Defense (LLM-Powered)

Technologies: Python, PyTorch, Hugging Face (DistilBERT), LangChain, Ollama, Docker, FastAPI

- Fine-tuned a DistilBERT phishing detection model with active learning and adversarial retraining, improving accuracy from **89% to 97%** and reducing false negatives in real-world email data.
- Engineered an automated red-teaming loop using LLM-generated attack prompts to harden the model against prompt injection and zero-day phishing patterns, deployed as a real-time inference API.

• Deep Reinforcement Learning (DRL) for Network Optimization

Technologies: Python, PyTorch, Stable Baselines3, Mininet

- Implemented a **DDPG-based reinforcement learning agent** to optimize network routing decisions, reducing latency and improving throughput under dynamic traffic conditions.
- Designed multi-objective reward functions (latency, jitter, fairness) and validated performance using Mininet with realistic traffic patterns (VoIP, iPerf).
